

Project#1: Ground Truth

3/28: 125

3/29: 133

3/30: ?

3/31: ?

4/01: ?

Project#2: *X*-generation

Project #2: *X*-generation

- GAN approaches for creating things
- *X* can be anything, such as
 - ☐ Image
 - ☐ Text
 - ☐ Music
 - ☐ Speech
 - ☐ Animation
 - ☐ Drawing
 - ☐ ...

Project #2: *X*-generation

- Can be either *unconditioned* (GAN) or *conditioned* (c-GAN) ← bonus!

Example: Image generation

- CIFAR10

- ❑ 32*32 RGB images

- ❑ 5000 samples / per class

- ❑ 10 classes (airplane, automobile, bird, cat, deer, dog, frog, horse, ship, truck)

Important date

- Due on 23:59 May 1 (Sunday)

Please submit (via moodle)

- ❑ A **technical report** summarizing your model design and implementation
- ❑ The report should also contain generated samples (if possible, e.g. images), *and optionally a link to the generation results.*
- ❑ (Optional) A zip file containing a few (less than 20) generated samples.

Do **NOT** accept late submission.

Please start early!

For DL beginners

TA will provide a tutorial on how to start this project next week. (April 6)

Still, please start early!
